Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 6-12, 28-31 and 43-49, drawn to a system comprising a buffer to isolate inputs, classified in class 73, subclass 654.
 - II. Claims 13-15, 33, 51 and 52, drawn to a system comprising a JFET transistor to amplify an electrical signal, classified in class 73, subclass 654.
 - III. Claims 16-19, 34 and 53-55, drawn to a system comprising a Darlington transistor to provide low output impedance, classified in class 73, subclass 654.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, a system comprising a buffer to isolate inputs can be used without a JFET transistor to amplify an electrical signal and a Darlington transistor to provide low output impedance. Likewise, a system comprising a JFET transistor to amplify an electrical signal can be used without a buffer to isolate inputs and a Darlington transistor to provide low output impedance. And a system comprising a Darlington transistor to provide low output impedance can be used without a buffer to isolate inputs and a JFET transistor to amplify an electrical signal.

See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Claims 1, 23 and 38 link inventions I, II and III. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s). Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
